

1     **WHAT IS CLAIMED IS:**

2             1. A method for producing jerked meat rawhide chew toys comprising  
3     the steps of

4             forming rawhide chew toys;  
5             preparing meat to maintain the meat fresh;  
6             processing the meat to increase the meat taste;  
7             coating the rawhide chew toys with meat; and  
8             drying the rawhide chew toy coated with meat.

9             2. The method for producing jerked meat rawhide chew toys as claimed  
10    in claim 1, wherein the step of forming rawhide chew toys comprises

11            breaking rawhide into pieces,  
12            extruding the broken rawhide in a sheet and  
13            twisting the sheet into a bone shape.

14            3. The method for producing jerked meat rawhide chew toys as claimed  
15    in claim 2, wherein the step of preparing meat comprises immersing meat in a  
16    treatment solution that comprises propylene glycol, sorbitol, vitamin C,  
17    potassium sorbate, polyphosphate, sodium nitrite and water for 6 hours.

18            4. The method for producing of jerked meat rawhide chew toys as  
19    claimed in claim 3, wherein the meat is immerse into the treatment solution  
20    containing 1 wt % propylene glycol, 3 wt % sorbitol, 0.1 wt % vitamin C, 0.2 wt  
21    % potassium sorbate, 0.1 wt % polyphosphate, 0.1 wt % sodium nitrite and the  
22    remaining is water.

23            5. The method for producing of jerked meat rawhide chew toys as  
24    claimed in claim 3, wherein the step of processing the meat comprises

1 removing the meat from the treatment solution,  
2 drying the meat,  
3 breaking the meat into pieces and  
4 adding spices.

5 6. The method for producing of jerked meat rawhide chew toys as  
6 claimed in claim 5, wherein the step of coating the rawhide chew toys with meat  
7 comprises directly spreading the processed meat on the surface of the rawhide  
8 chew toys.

9 7. The method for producing of jerked meat rawhide chew toys as  
10 claimed in claim 5, wherein the step of coating the rawhide chew toys with meat  
11 comprises extruding the processed meat through a mold onto the rawhide chew  
12 toys.

13 8. The method for producing of jerked meat rawhide chew toys as  
14 claimed in claim 6, wherein the step of drying the rawhide chew toys coated with  
15 meat is divided into three phases, wherein

16 the first phase comprises drying the rawhide chew toys coated with meat  
17 at room temperature for 3 hours in the presence of fans;

18 the second phase comprises further drying the rawhide chew toys coated  
19 with meat in an oven at 50°C for 3 hours; and

20 the third phase comprises completely drying the rawhide chew toys  
21 coated with meat in the oven at 70°C for 15 hours.

22 9. The method for producing of jerked meat rawhide chew toys as  
23 claimed in claim 7, wherein the step of drying the rawhide chew toys coated with  
24 meat is divided into three phases, wherein

1           the first phase comprises drying the rawhide chew toys coated with meat  
2   at room temperature for 3 hours in the presence of fans;  
3           the second phase comprises further drying the rawhide chew toys coated  
4   with meat in an oven at 50°C for 3 hours; and  
5           the third phase comprises completely drying the rawhide chew toys  
6   coated with meat in the oven at 70°C for 15 hours.

7           10. The method for producing jerked meat rawhide chew toys as claimed  
8   in claim 1, wherein the step of producing meat comprises immersing meat in a  
9   treatment solution that comprises propylene glycol, sorbitol, vitamin C,  
10   potassium sorbate, polyphosphate, sodium nitrite and water for 6 hours.

11           11. The method for producing of jerked meat rawhide chew toys as  
12   claimed in claim 10, wherein the meat is immerse into the treatment solution  
13   containing 1 wt % propylene glycol, 3 wt % sorbitol, 0.1 wt % vitamin C, 0.2 wt  
14   % potassium sorbate, 0.1 wt % polyphosphate, 0.1 wt % sodium nitrite and the  
15   remaining is water.

16           12. The method for producing of jerked meat rawhide chew toys as  
17   claimed in claim 11, wherein the step of processing the meat comprises  
18       removing the meat from the treatment solution,  
19       drying the meat,  
20       breaking the meat into pieces and  
21       adding spices.

22           13. The method for producing of jerked meat rawhide chew toys as  
23   claimed in claim 1, wherein the step of coating the rawhide chew toys with meat  
24   comprises directly spreading the processed meat on the surface of the rawhide

1 chew toys.

2 14. The method for producing of jerked meat rawhide chew toys as  
3 claimed in claim 1, wherein the step of coating the rawhide chew toys with meat  
4 comprises extruding the processed meat through a mold onto the rawhide chew  
5 toys.

6 15. The method for producing of jerked meat rawhide chew toys as  
7 claimed in claim 1, wherein the step of drying the rawhide chew toys coated with  
8 meat is divided into three phases, wherein  
9 the first phase comprises drying the rawhide chew toys coated with meat  
10 at room temperature for 3 hours in the presence of fans;  
11 the second phase comprises further drying the rawhide chew toys coated  
12 with meat in an oven at 50°C for 3 hours; and  
13 the third phase comprises completely drying the rawhide chew toys  
14 coated with meat in the oven at 70°C for 15 hours.
